	Approved For Release 20	006/07/24 : CIA-RDP82M00531R000400010015-8
-		DCI/IC 73-0587 19 June 1973
	MEMORANDUM FOR THE REC	CORD
	SUBJECT: COINS Netwo	rk Improvement
	a meeting on 18 June 1 tions Working Group (6 to improve the communi	er briefed the attendees (Attachment) at 1973 on the activity of the COINS Communi CCWG). Specifically the CCWG is charged ications system by making the COINS interprove the response time.

E.A.	3. The gut issue	e, I believe, revolves around the overall
M	system user requirementalities and number of us	nts. That is the projections of number of sers on the system 2, 3 or 5 years hence.
N	system user requirementalized and number of use This will directly important the COINS network; i.e.	nts. That is the projections of number of sers on the system 2, 3 or 5 years hence. pact upon the communications required for e type of IMP and communication channel
N	system user requirementiles and number of use. This will directly imported the COINS network; i.e. bandwidth. The conceptases is also an integrit of the relationship be	nts. That is the projections of number of sers on the system 2, 3 or 5 years hence. Pact upon the communications required for e., type of IMP and communication channel pt of centralized vs. distributed data gral part of this issue. Also involved etween COINS and IDHS (Intelligence Data
N	system user requirementiles and number of use This will directly impute COINS network; i.e bandwidth. The conceptases is also an integrit of the relationship be Handling System) and System (WWMCCS). These	nts. That is the projections of number of sers on the system 2, 3 or 5 years hence pact upon the communications required for e., type of IMP and communication channel pt of centralized vs. distributed data gral part of this issue. Also involved etween COINS and IDHS (Intelligence Data the World Wide Military Command and Contract issues were not addressed by the ASD/I
A	system user requirementiles and number of use This will directly imported the COINS network; i.e. bandwidth. The concept bases is also an integrate is the relationship be Handling System) and System (WWMCCS). These COINS Evaluation Review not in my mind to make 24 menths) but what is	nts. That is the projections of number of sers on the system 2, 3 or 5 years hence, pact upon the communications required for e., type of IMP and communication channel pt of centralized vs. distributed data gral part of this issue. Also involved etween COINS and IDHS (Intelligence Data the World Wide Military Command and Contrese issues were not addressed by the ASD/I ew Group. Therefore the basic problem is the present system interactive (in 18 to the projected configuration and use of
N	system user requirementiles and number of use This will directly imported the COINS network; i.e. bandwidth. The concept bases is also an integrated is the relationship be Handling System) and System (WWMCCS). The COINS Evaluation Review not in my mind to make 24 months) but what is the system for the furquired. These questions	nts. That is the projections of number of sers on the system 2, 3 or 5 years hence, pact upon the communications required for e., type of IMP and communication channel pt of centralized vs. distributed data gral part of this issue. Also involved etween CÖINS and IDHS (Intelligence Data the World Wide Military Command and Contrese issues were not addressed by the ASD/I ew Group. Therefore the basic problem is the present system interactive (in 18 to the projected configuration and use of ture and the resultant communications recons should be addressed prior to approving
N	system user requirementiles and number of use This will directly imported the COINS network; i.e. bandwidth. The concept bases is also an integrate is the relationship be Handling System) and System (WWMCCS). The COINS Evaluation Review not in my mind to make 24 months) but what is the system for the further system.	nts. That is the projections of number of sers on the system 2, 3 or 5 years hence, pact upon the communications required for e., type of IMP and communication channel pt of centralized vs. distributed data gral part of this issue. Also involved etween CÖINS and IDHS (Intelligence Data the World Wide Military Command and Contrese issues were not addressed by the ASD/I ew Group. Therefore the basic problem is the present system interactive (in 18 to the projected configuration and use of ture and the resultant communications recons should be addressed prior to approving
